# Cient Meeting

Friday, 10.01.2021

---

## Attendees

Keira,

Shaya,

Will

Other Teams (im not writing all these names)

Clients (Misu?, Lukman)

## Agenda

### Last Meeting Follow-up

1. Possible options - different frameworks?,
2. Teams cannot collaborate
3. Teams must do the same project
4. Try to be consistent with db language
  - a. Agree on tables, and names SQLServer(?)
  - b. Each team has own instance of db
5. Cloud provider depends - see if we get there
  - a. When a project gets to finished place
6. Docker probs good idea
7. Language
  - a. Doesn't like JS, react > JS
  - b. Use frameworks not plain JS
  - c. Wants to abstract things as much as possible
  - d. Language is our choice
  - e. Just sync db

### New Business

---

- 
8. Web App?
    - a. Portal
    - b. Webapp
    - c. Creating using interface for database
    - d. Both web (people getting results) and desktop based (lab people)
  9. User Groups:
    - a. Canadians/North Americans
    - b. Labs (depends, clinical, **analytical testing labs**, industry labs)
      - i. E.g iron blood test
    - c. Supports many labs, section it off for different clients

## Next Meeting Agenda Items

- Framework by Mon!
- Features (must, nice to have, if you could)
