# Client Meeting

Monday, 18.10.2021

---

## Attendees

Keira  
Shaya  
Matt  
Lukman  
Rick - late  
Ramisa - late  
Misu - late

## Agenda

### Last Meeting Follow-up

1. Story Draft
  - a. We got more detail! - just before the meeting but we didn't have enough time to review before the meeting
2. UI Drafts?
  - a. Doesn't sound like this is a priority
  - b. But we can fix this later

### New Business

3. What are the login details?
    - a. Username + password, email + password, either or?
    - b. Are client and employee login pages the same?
    - c. Different pages? Should they link to each other
  4. I can't think of any more questions, maybe next week once we get started on more detail work
  5. ^ I think all this is covered in the new doc
-

## Notes

- **Steps:** gettings started on the app; starting to implement
- Next steps will be more detail-oriented
- Next big prof things is - Peer Testing #1 Nov 27th
- Req is the full system
- Another team is using Go which is cool

## Action Items

1. Starting on building the app
2. I think we should build the database as we go instead of implementing it all at once
  - a. Easier to add relationships/tables as needed instead of changing them later
3. Do the UI later - doesn't seem to be a priority
4. I think we should create a summary document for our different steps based off all the different docs we have now

## Next Meeting Agenda Items

We will get some next step next week
