NOTES

- Team 0: Registration page, different nav bar, unit tests, order submission form, commenting the code, structure explanation, writing tests, revising testing structure, testing documentation
- Team 1: bug fixes, UI fixing, setting up some test, clean up the code, looking into starting new features, small functionality and UI bugs
- Team 2: bar code research, generate codes for each sample (and sub samples), update database dynamically, order confirmation page, cart page, dynamic generation of the test view, populating database,
- We haven't been told anything about specific security measures
- Just one person needs to present to the TA, Wednesday the 26th, we haven't heard from the TA, one or two slides present feature for 3rd and 4th milestone, use a chart, not formal, part of gitstats next week, features are broken down into smaller tasks, just the team manager just needs to be there
 - Gema will contact the TA about this

ACTION ITEMS
