Agenda

Last Meeting Follow-up

1. From the Client Meeting, New Tickets
 - Investigate Barcode generation/reading
 - On Employee Site, list samples
 - Investigate search bar for sorting through samples
 - Django static files

New Business

2. Git stats - Friday

Project

Progress

1. Allow certain types of users to have different navbar buttons - Shaya
 - a. Is staff check box + changes on pages
2. Put different types of users in groups - Shaya
3. Testing doc w/ example test - Will
4. Shopping cart change hardcoded to variables from database - Sayo
 - a. Getting help from TA
5. Clean Up README - Keira

Blockers/Surprises

1. Weird merge conflict with our binary bak file
2. Orders view method results() - if there are no results
 - a. Must have orders and test results or else get exception

Plan

Next Week

1. Functions for shopping cart - Sayo
2. Comment all our code for understanding - Keira
3. Bugfix (see blockers/surprises) - Will
4. 100% coverage for tests - Will
5. Bar code investigation - Will
6. Registration page clients - Shaya
7. Registration page clients - Shaya
8. Redirect to top page, client page, customer page, etc - Shaya

Goals for next Milestone

1. Barcode stuff working
2. Shopping cart
3. (need more details from client)

Notes

- Automatically set staff permissions - possibly on creation, with lab_workers, lab_admin etc.
- Difference between our data models and our Django accounts/users
 - Django best practices?

Action Items

1. Ask for workflow from order for a test is placed from client
 - Step by step in detail
2. Git Stats - Friday
