
Client Meeting

Monday, 17.01.2022

Attendees

Keira, Shaya

Clients: Lukman

Other Teams: Ramisa, Matt

Agenda

New Business

1. The client sent info to Prof on how things are going
2. Reviewing details of the given steps
 - a. Barcodes: keep the sample anonymous; barcode will pull up sample information
 - b. The sample number would stay the same throughout -> sample number could be the same as the bar code
 - c. One sample might go to multiple tests but will be split up before this
 - i. So Sample 1 will be split up into sample 1.1, sample 1.2 etc. and sample 1.1 will get test A and sample 1.2 will get test B
 - ii. Need a barcode for sample 1.1 and a barcode for sample 1.1.1

Action Items

1. Investigate barcode generation
 2. I think we already have the rest of the stuff
 3. Maybe add something on the client-side for entering sample numbers to get info
-
